TB-1

TALKBACK

The TB-1 TalkBack is a battery operated talk back system for microphone boom operators. The TB-1 enables the mixer and two boom locations to maintain full duplex telephone style communication. The TB-1 also features a call light to signal all operators in the system. A low voltage indicator alerts the user when the 9volt battery in the quick release battery compartment needs to be replaced. The TB-1 system operates on a single pair using standard XLR 3 Pin microphone cables.

FEATURES

FULL DUPLEX TALKBACK between all stations. Including an internal microphone when an external mic is not needed.

CALL LIGHT for signaling any station when momentary talk is pressed.

LEFT & RIGHT PROGRAM INPUT to mix left and right making the TB-1 a stand alone monitor system.

THREE LEVEL VOLUME SWITCH using standard stereo headphones.

QUICK CHANGE BATTERY COMPARTMENT for standard 9 volt batteries.

SPECIFICATIONS

SIZE: 3.25" x 4.6" x 1.25" (82.5 x 117 x 31.75mm)

WEIGHT: 11oz (308g)

POWER: One 9 volt alkaline battery per box, at 4mA (12mA with LED on). Low battery indicator lights at 5 volts.

INPUT: Impedance = 100k OHM/INPUT

OUTPUT: Will drive standard 70 OHM stereo earphones.

RESPONSE: +/-2dB, 40HZ to 15KHZ

DYNAMIC RANGE: Approximately 70dB
